

I GR am told by Andre Malraux in his Colonel manner he expected Mr & Mrs
Winnlemann here... *Really the*
matter is he can be a bit shy...I have noticed things & so have our Convent School Class
-

Esther is asked again...Uncle Potter has been grumbling to me...“ I expected that old
Winnlemann here *Greta*
h - I'm
not an intellectual...I will do my best- DAMN ! I can talk about cricket...the Lifeboat...
Win was supposed to have fixed all this...”

*... I think probably Colonel Andre would rather we go & play Neolithic families on the
beach with a sandwich...a flask of hot tea...a bottle of beer for him also ...*

(I G.R. think Miss Win was told by her criminally insane sister Teresa & her bastard du
Cann ... not to let Professor & Mrs Winnlemann talk to Fred
& Esther Potter !

1947 early January Engagement luncheon :

...because something would be said about we the engaged couple had no worries over money... `Plenty there from Margaret Ransom to buy a Manor House etc `... & Andre would have no need to worry over money for his French families for he is GUARDIAN to the biggest Estate the globe...

The former position in medicine on the Continent of Professor Winnclemann would have he with his quick mature intelligence pick up that the inheritance was not from the Misses Williams sisters of Greta's grandmother...

that it had to be vast as it was global

-

It would all be grasped swiftly by Winnclemann if he heard the name MARGARETHE GROTE ... ! He would ask questions at the luncheon...he would of course wish to know more about my father FJR & the rest of the SEAFARING RANSOM family who held still much property in Germany...had ancestry & were very well known...along the Rhine...anywhere you could sail a ship to...

Andre is not raised to follow with his understanding into such depths of EVIL - he is still a young man...he is very polite...

WE HAVE GHOULS IN THE RAFTERS

...& are ringed about by BIRDS OF PREY...)

G.R. sensed a certain stress in Colonel Andre of Gaul -

` I spoke cheerfully...Esther`s high heeled shoes helping my poise enormously - I talk of the lunch & the new house & the children...

**the cricket Town matches can be watched from the garden... The wine has come from an old friend-he put a cellar down always before the War-so it is old-
he always got advise from Colchester**

-

I said it was really still like Wartime this year... & I expect Esther worried there might not be enough food... we are feeding the dear Germans as Auntie Win says...`

(

The shop Colchester

we went into 1937 with Josette & Unity`s mother...Andre will have a memory here but not me...

unless he or someone puts that memory back...)

That afternoon Colonel ANDRE tells me as we walk along the ancient Valley Road past a great Manor House *sadly pulled down ...*“ When we have our home I will expect a number of people for Sunday lunch ...”

it was now getting misty cold coming in from the sea...we walked to Jo`s beach...

I G.R. ... felt that ANDRE MALRAUX was emotionally trying to cope with the horrible turn of FATE... **a WAR when Spain had shown them fighting was not the way always...had brought him here to happiness Summer 1937 ...& he made decisions about his life...the way forward...**

1947 - I can only try `give George-Andre ROOTS`...it is my Convent School class & Nuns I rely upon to hold me clear thinking...I was well aware of that...I a young girl-woman now who could still stride the centuries even though the memory was gone... a world has to be in touch with its ancestry & present & GO TO THE STARS...`

1937 SUMMER Rain day - with Josette Clacton-on-Sea...

& I tell ANDRE & JO summer 1937 of our histories if an honest remark is required to something we are discussing - **ANDRE- Saint George h**
e thinks I dream-

I have been told to remember that they have
COME FROM SPAIN

& need a good rest-time to themselves to talk-

But Josette is happy for me to take him out & give her time to write-

She knows when he is impatient I will say to him `YOU ARE LOSING YOUR GRACE - that you were born with, a gift from your Guardian Angel`

He may say`

SAY it again-if you DARE`

- putting me on a high place or he may nod

in agreement & even ask something of *meeh...*

But JOSETTE one afternoon a wet day had me GR build for her

THE ISLAND IN THE SNOW in Unity's grandpa's bricks from his childhood. Josette was making notes... she writes headlines sub-head lines across the page- she thought she might do a story...

he

Saint George Andre

is` round the town`

talking his head off but listening also-

he doth get some learning

from all the people he now knows & calls friends

.
We girls do not keep him tied to our apron strings.

I thought I might make some more fairy cakes

but JO

says Andre will be calling at the Co-op & he likes to choose cakes & bring them back for a surprise to

us...

he may have been taught this when he was a big child-

So I began to build & speak on the Island that is really our home in Greenland - THE ETERNAL STAIRCASE to the harbour -

where every child born on the Island has its name CARVED...

Josette can do marvellous paper work & from newspapers too - she makes hats & things anything you want out of papers -she made a ship & smaller ships that come to the PLAY Season Jacopsholmen in the SNOW as I spoke to her...

I tell her the first Season was to be for 6 weeks but it lasted Seven months & they had to make a Theatre outside as well for the Northern Lights...that is Fred & the Greenlanders -

he is my grandpa's grandpa-

they heated the seats-they invent everything up there if it is needed- I think he did it like the Romans did- but we do have two little oil wells in Kentucky...

we saved the lives of two tiny Oil worker boys & some more & brought them up for a good education -

“ The 5 Romney boys were very pleased with themselves after 2 years schooling -they were such a trial until Fred sailed them down to New York showed them good houses kind people- then he threw them out on the harbour wall & said

`now you can see what it is like when you do not have our education`

... Next day they said they would learn everything in the school -
BUT it was finding Tomato ketchup that won their hearts-
so barrels & barrels of it had to come up all the time to The Holm- they'd have ham &
eggs at weekends-
in the restaurant in the sky
-

Well- they are Fred`s experimental buildings for the first Colleges of the University of
